## Soberanes Fire Weather Forecast

**FORECAST NO:** 9

**NAME OF FIRE:** Soberanes

**PREDICTION FOR:** 0700 Mon-0700 Tue

**UNIT:** CA-BEU/LPF

**SHIFT DATE:** 8/1-8/2

**SIGNED:**

**TIME AND DATE**

**Incident Meteorologist- Ryan Walbrun**  
**NWS-Bay Area**

**FORECAST ISSUED:** 1900 7/31/16

**WEATHER DISCUSSION:** The marine layer is deeper between 2000 and 2500 feet. This will keep slightly cooler and wetter conditions across the lower and mid slopes of the fire. Continued warm and dry across the interior of the fire. General wind flow will remain from the southwest and be adverse to the line near White Rock and Branch II as well as pushing any smoke over the Carmel Valley helibase. Humidity readings will be higher than previous days especially between 2000 and 2500 feet which may hamper planned burn operations in Branch II. Winds along Highway 1 in Branch 9 will continue to be from the south but not as strong as previous days except gusts to 25 mph near the A/Z break. Low humidity readings will continue to be a concern for night operations above the marine layer as it spreads inland and up Carmel Valley. Alpha strike teams roaming Carmel Valley Rd will notice that the strongest seabreeze winds occur from Garland Park into the village each afternoon through about 7 pm.

**WEATHER FORECAST FOR Monday:**

**WEATHER:** Fog and clouds coast and Carmel Valley Rd clearing back to Hwy 1. Otherwise widespread smoke except full sunshine Sur Zone south of Pico Blanco.

**TEMPERATURES:** 1-4 degrees cooler. 75-85 smoky areas below 2500 feet. 90-95 full sunshine above. 62-72 along Hwy 1 in Branch 9.

**HUMIDITY:** Afternoon minimums 19-29% above 2500 feet inland Divisions. 60-75% Branch 9.

**20 FT WINDS:**

**RIDGETOP -** Southwest 4-8 mph afternoon gusts 12-14 mph. Except southerly along Hwy 1 with gusts to 20 mph in Branch 9.

**SLOPE/VALLEY -** Becoming upcanyon 2-5 mph afternoon gusts 10-12 mph.

**Marine Layer:** 2000-2500 feet...deepest along Hwy 1.

**WEATHER FORECAST FOR Monday Night:**

**WEATHER:** Areas of smoke otherwise clear. Mild and dry with low humidity hills except fog on the coast.

**TEMPERATURES:** 65-75 above 2500 feet. 51-58 along Hwy 1 and up Carmel Valley.

**HUMIDITY:** Poor recovery 20-30% above 2500 feet...locally 10-20% around 3000-5000 feet late. Good recovery 70-90% lower slopes Branch 9 along the coast.

**20 FT WINDS:**

**RIDGETOP -** Southwest 3-6 mph.

**SLOPE/VALLEY -** Evening upcanyons 2-5 mph...becoming downcanyon 1-4 mph overnight.

**Marine Layer:** 2000 to 2500 feet.

**Portable RAWS 163.350** Tone 0031 for Bottchers Gap, Tone 0032 DP1, Tone 0034 Pinyon Peak, Tone 0035 White Rock, Tone 0029 for Blue Rock, Tone 0038 Chews Ridge, Tassajara Hot Springs 0039.

# FIRE BEHAVIOR FORECAST

FORECAST NUMBER 8	TYPE OF FIRE SURFACE
FIRE NAME SOBERANES	OPERATIONAL PERIOD 8-1-2016 24 HOUR SHIFT
DATE ISSUED 7-31-2016	TIME ISSUED 1900 HOURS
UNIT CALFIRE BEU/LOS PADRES FOREST LPF	SIGNED  TIM CHAVEZ FBAN

## INPUTS

WEATHER SUMMARY SLIGHT COOL DOWN CONTINUES. MARINE LAYER DEEPENS.  
PLEASE REVIEW INCIDENT METEOROLOGIST FORECAST

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL

ENERGY RELEASE COMPONENT OF THE NFDRS IS FORECAST TO BE 71 TODAY. ALTHOUGH THE TREND IS DOWNWARD, IT IS STILL THE 90<sup>TH</sup> PERCENTILE. FINE DEAD FUEL MOISTURE RANGES FROM 3% ON SOUTH FACING SLOPES IN THE SUN TO 8 IN THE SHADED DRAINAGES. LIVE FUEL MOISTURES ARE NEAR CRITICAL LEVELS. PROBABILITY OF IGNITION RANGES FROM 40% IN SHADED AREAS TO 88% IN THE SUN ON SOUTH SLOPES. THE FIRE IS IN THE BASIN BURN FOOTPRINT AND THERE ARE HEAVIER FUELS THAN WOULD BE EXPECTED FOR AN 8 YEAR BURN. THERE ARE MANY DOWN LOGS AND SNAGS INSIDE THE BURN. SMOKE REDUCES VISIBILITY SO IT IS DIFFICULT TO LOCATE THE FIRE EVEN WHEN IT IS NEAR.

#### SPECIFIC

##### CARMEL ZONE

##### BRANCH I

DIVISIONS A, B, C, F

FIRE ACTIVITY IN THESE DIVISIONS IS FINALLY QUIETING DOWN. A AND B MAY BE IN PATROL STATUS SOON. C AND F ARE STILL ACTIVE IN HEAVIER FUELS BUT HAVE SLOWED OR STOPPED FORWARD PROGRESS. ROLL OUT WILL STILL BE A HAZARD.

##### BRANCH II

DIVISIONS G, H, I, J AND FIRING BRANCH

FUELS IN THE FIRING AREA ARE A MIX OF BRUSH, GRASS OAK UNDERSTORY. THE BRUSH ON THE OPEN RIDGETOPS WILL PRESENT THE GREATEST ENERGY PRODUCER AND WILL HAVE TO BE FIRED SO THAT A BACKING FIRE RESULTS. MODERATING HUMIDITY WILL KEEP THE FIRE ON THE GROUND IN UNDERSTORY IN THE OAKS. WATCH FOR TURBULENT AIR FLOW NEAR THE OLD RESERVOIR. MAXIMUM SPOTTING DISTANCE FROM THE CLEMENTE RIDGE 0.4 MILES.

##### BRANCH III

DIVISIONS K

FIRE CONTINUES AN EASTERN MOVEMENT ABOUT A MILE A DAY. HEAVY DROUGHT STRESSED FUELS ARE RESPONSIBLE FOR HOW THE FIRE IS MOVING ON THE RIDGES.

##### SUR ZONE

##### BRANCH VIII

DIVISIONS N, O, P

THE FIRE IS ON THE EDGE OF THE SOUTH FORK OF THE LITTLE SUR RIVER IF NOT OVER. A SLOPE REVERSAL RUN TO THE SOUTH IS POSSIBLE TOWARD THE POST SUMMIT AND THE OLD COAST ROAD. SHORT DURATION CROWN RUNS ARE POSSIBLE IN STEEP DRAINAGES AND CHIMNEYS.

##### BRANCH IX

DIVISIONS S, T, X, Z

THE FIRE IN THIS BRANCH IS REMARKABLY ACTIVE IN VERY HIGH HUMIDITY ALL HOURS OF THE DAY AND NIGHT. PERSISTENT DROUGHT AND HIGH DEAD FRACTION IN THE BRUSH MAY BE THE CAUSE. THE FIRE WILL CROSS WET CREEKS AND DRAINAGES. STEEP SLOPES MAKE ACCESS AND TAKING ACTION DIFFICULT AND HAZARDOUS. ROLLOUT AND SPOTTING ARE A DANGER. THE COASTAL JET WILL BE WEAKER AND SO THERE WILL BE LESS WIND ON THE RIDGETOPS.

#### AIR OPERATIONS:

SMOKE STILL A PROBLEM DURING THE DAY ON MANY PARTS OF THE FIRE.

## SAFETY

- TREES FALLING SHORTLY AFTER FIRE PASSAGE MAKE IT HAZARDOUS TO DO GOOD MOP-UP AND OVERHAUL. POST A LOOKOUT AND WATCH FOR WIND AND LEAN ON FIRE WEAKENED TREES.
- IF A COLUMN FORMS DURING BURNING, WATCH FOR ROTATION INDICATING STRONG CONVECTION. THE RESULT MAY BE NUMEROUS SHORT DISTANCE SPOTTING AND/OR FIRE WHIRLS.
- POST A FIRE WEATHER WATCH 24 HOURS A DAY AND NOTE THE TIMES THAT RELATIVE HUMIDITY BOTTOMS OUT SO YOU CAN KNOW IF THE THERMAL BELT IS WHERE YOU ARE.

# SAFETY MESSAGE SOBERANES

## SNAGS HAZARD TREES and ROCKS

PREVIOUS SHIFT PERSONNEL CONTINUE TO REPORT ISSUES WITH SNAGS

### Watch Out

- Ground cover has burned loosening the stability of the root system
- Oak trees are susceptible to limb fall this time of year as they stressed
- Fire suppression, air drops and dozers can dislodge rocks, logs and boulders

### Mitigation

- Remove the hazard if safe to do so
- Flag and report the hazard to personnel
- Be alert while working and driving in hazard area, listen and 'yell out' to others

## COMPLACENCY

THE FIRE IS WINDING DOWN IN SOME DIVISIONS – DON'T GET COMPLACENT

### Watch Out

- Routine work may cause you to forget to drink fluids and rest
- Accidents occurring in deceptively quiet areas of a large fire is a common denominator for fire line accidents
- Many accidents occur during mop-up operations – this is not the time to get hurt.

### Mitigation

- Slow down and take breaks during exhaustive work
- Drink plenty of water throughout the shift-even if you're not thirsty
- Now is when some personnel may begin to forget the basics

## GENERAL HEALTH

EXHAUSTION MAY COMPROMISE SAFETY!

### Watch Out

- Diet can cause chronic feelings of exhaustion
- Arduous work can consume body fluids, electrolytes at higher rates
- Steep terrain and hot dry conditions increases the risk of fatigue and exhaustion

### Mitigation – Proper nutrition reduces fatigue and exhaustion emergencies

- Eat foods which provide steady energy • limit sugary, fatty, fried and processed foods
- Hydrate-proper hydration prevents fatigue • Manage work rest ratio while performing work
- Be on the lookout for signs of exhaustion and lookout for one another

Note: Anyone that witnessed or has firsthand information of the dozer roll over fatality that was not interviewed by the SART please contact Chris Carrera at 951-757-5932

Austin L. Browne(COML)				5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA							

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Kx and Ix reversed.

## 8. MEDICAL EMERGENCY PROCEDURES

### EMERGENCY FREQUENCY: CALCORD

#### LINE EMERGENCY:

Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
  1. Closest EMS resource
  2. Communications Unit
- Communications Unit contacts:
  1. Ground or Air ambulance as requested
  2. Operations
  3. Safety
  4. Medical Unit (916) 622-3371
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
  1. A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

#### INCIDENT BASE EMERGENCY:

Contact Communications on CDF CMD 2 with patient complaint/symptoms and location. Communications will respond appropriate medical response.

- Communication contacts:
  1. Medical Unit
  2. Safety
  3. Logistics
  4. Operations
  5. Crew Supervisor
  6. Comps/Claims

## PUBLIC INFORMATION SECTION

Incident Information Line: (831) 204-0446 or 211

Incident Media Line: (831) 647-6257

STATUS	
Incident Start Date: 07/22/2016	Incident Start Time: 8:48 am
Incident Type: Wildland	Cause:
Incident Location: Soberanes Creek, Garrapata State Park, Palo Colorado, north of Big Sur	Total Personnel:
Acreage:	Containment:

**MEDIA** – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. You can get further information about Penal Code Section 409.5(d) at <http://www.leginfo.ca.gov/cgi-bin/displaycode?section=pen&group=00001-01000&file=403-420.1>

**CAL FIRE SOCIAL MEDIA POLICY** – When on a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can get further information about the CAL FIRE Social Media Policy at <http://calfireweb.fire.ca.gov/library/handbooks/0600/0691.pdf>

**PHOTOGRAPHS AND VIDEOS OF INCIDENT** – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics. You can also send your photographs and videos to the following email [Soberanesfire2016@gmail.com](mailto:Soberanesfire2016@gmail.com)

**LOST AND FOUND** – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

**MAIL SERVICE** – The Information Section will assist you in getting items mailed from the incident as well as receiving items whether it is letters or packages.

# **CAL FIRE**

## **INCIDENT MANAGEMENT TEAM**

### **WATER USAGE PLAN**

#### ***California Drought Emergency***

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

#### **Fireline personnel- (During mop up operations)**

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

#### **Road Maintenance and Repair-**

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc).
- Consider use of tertiary or treated water (sp)

#### **Aviation Operations-**

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

#### **Private Water Supplies-**

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

#### **Public/ Municipal Water Supplies-**

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

#### **Management and Supervision-**

- Use leaders intent and consider establishing Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Consider establishing a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

# CAL FIRE

## INCIDENT MANAGEMENT TEAM

### WATER USAGE LOG

DATE: \_\_\_\_\_

Division / Group: \_\_\_\_\_

AGENCY ID / VENDOR: \_\_\_\_\_

I.e., Strike Team 1110C, Acme Water Tenders

REQUEST # \_\_\_\_\_

**TURN INTO FINANCE DAILY**

WATER SOURCE LOCATION	Hydrant	Open source i.e. pond	Tank	Gallons Used	Property Owner / Contact Number if known **

**\*\*Please note if you made contact with property owner and their contact.  
(Use reverse side if needed.)**  
**Information:** \_\_\_\_\_

The intent of this document is intended to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

# **TRAINING SPECIALIST MESSAGE**

**A Training Specialist is available for trainees on the incident. Get registered early!!!**

**All federal, state and local government agency trainees working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.**

**Drop off boxes located @ Pfeiffer, Carmel & Toro ICP's.**

**Complete Trainee Data Form & place in Drop off box.**

**Upon Demob, This will be your last opportunity to check out with the Training Specialist @ Fort Ord.**

## **Questions**

**Dennis Martin 707-479-8421**

**Jonathan White 562-324-1811**

**Aaron Grove 530-394-8094**

## **DEMOB**

### **SOBERANES INCIDENT**

### **CA – BEU – 003422**

- Resources must Check-In prior to the Demob process.
- In order to be deemed excess, supervisors must submit an ICS #213 to the Resources Unit.
- Strike Team Leaders and/or Overhead personnel report to Demob (ICP-Toro Park) at the times posted on the Tentative Demob List, which is posted around the Incident Base and through the QR Reader.

\*Engines should remain at the Camp assigned to, until STEN advises their resources to depart to vehicle inspection. If the Strike Team has supplies and/or equipment checked out, the strike team leader should return the supplies. If needed, an engine may accompany the strike team leader.

- Prior to reporting to Demob (ICP – Toro Park):  
**Please return all supplies and equipment.**
- Resources will get signatures from the following units:
  - Motels
  - Supply
  - Ground Support
  - Weed Wash
  - Training (If they have a trainee)
  - Communications
  - Documentation
  - Time
  - Demob
- Vehicle Inspection will be completed at Fort Ord (Ground Support).
- All CAL FIRE and Federal employees will complete their “Time” at ICP (Toro Park). Then if needed, will report to vehicle inspection and weed wash. After vehicle inspection they will report to Demob to turn in their ICS #221, located adjacent to Ground Support.
- All Local Government employees will complete their “Time” with the OES representative located adjacent to Ground Support.
- After the #221 is given to Demob, all CAL FIRE, Federal, and Local Government personnel are approved to travel back to home unit or a reassignment.

## **GROUND SUPPORT**

- Highway 68 East
- Exit Reservation Rd
- Turn Left and follow Reservation Rd
- At Inter-Garrison Rd turn left
- At "T" intersection turn right (still Inter-Garrison Rd)
- Turn left onto 8th St
- Immediate right on A St
- SIGNS ARE POSTED ALONG ROUTE

## **DEMOB / TRAINING / OES**

- Exit Ground Support
- Turn Right on 8<sup>th</sup> St.
- First Left into driveway
- Park apparatus
- Report to DEMOB tent

## Directions to Ground Support from Incident Base / ICP

- Highway 68 East
- Exit Reservation Rd
- Turn Left and follow Reservation Rd
- At Inter-Garrison Rd turn left
- At "T" intersection turn right (still Inter-Garrison Rd)
- Turn left onto 8<sup>th</sup> St
- Immediate right on A St

• **SIGNS ARE POSTED ALONG ROUTE**

## **FIRE SUPPRESSION REPAIR PLAN**

### **SOBERANES FIRE: CA-BEU-003422**

Fire Suppression Repair is the repair of damage caused directly by fire suppression activities. It is not the repair of areas damaged by the fire activity itself such as burned material and secondary damage such as falling trees or erosion from hydrophobic soils. We are responsible for repairing only the damage caused by fighting the fire. We are also not responsible for upgrading facilities beyond their pre-fire condition.

#### **Instructions for suppression repair during mop-up**

While performing mop-up operations dozer or excavator operators will install waterbreaks on all dozer lines while dozers will install waterbreaks on secondary access roads. Dozer lines amongst the structures shall have the berms pulled and waterbreaks installed where necessary with hand crews to minimize the impacts on residents. Hand crews will install waterbreaks on all handlines, and waterbreaks on dozer lines situated on extremely steep slopes may also need to be installed by hand crews.

Scattered trash shall be collected and deposited in trash piles. Trash piles will be removed and placed at drop points either before or while hose lays are collected. Police your areas and clean them up as events wind down.

#### **Inventory and Mapping**

Suppression overhead and other personnel will document repair needs and their location. This information will be given to the Fire Suppression Repair Group. **GREEN** flagging will be used to designate area in need of repair. The type of repair/instructions will be written directly on the green flagging for ease of use.

#### **Objectives**

- Install waterbreaks while crews and dozers are actively onsite on roads, trails, and handlines damaged by fire suppression.
- Waterbreaks shall have proper angle and open outlets to insure effective drainage.
- Repair damaged fences (remember, those portions damaged by suppression efforts, not by the fire itself).
- Restore barriers on roads that were previously closed but opened for suppression activities.
- Insure that drainage is provided at crossings, ditch drains, remove deposited material, and stabilize approaches.
- Report any damage or damages mitigation to the Fire Suppression Repair Group.
- Complete all repair work as determined by the Fire Suppression Repair Specialist prior to final demobilization.

#### **Firelines/Existing Fuelbreaks/Staging Areas/Safety Zones/Heliports/Drop Points**

- Remove debris deposited during suppression activities, including flagging and signs.
- Install waterbreaks where necessary for erosion control.
- Pull berms back onto disturbed areas, except in areas identified as needing a berm to serve as a barrier for roads/trails.
- Spread brush across the disturbed areas to provide ground cover and a seed source.

- Masticators/excavators/dozers with brush rakes or grapples will be utilized on existing fuelbreaks utilized during suppression efforts to reduce any excessive fuel loading.

### **Roads**

- Clean culverts and drainage facilities plugged with soil and debris deposited during suppression activities.
- Re-establish cross drains and drainage if removed or made inoperable by suppression activities.
- Use cut brush – if available and nearby – to block off potential OHV access.
- Remove outboard berms created during suppression activities and incorporate into the road surface.

### **Watercourses**

- All slash; soil and debris deposited into watercourses during suppression activities shall be removed.
- All loose soil must be pulled away from the watercourse and stabilized (graded smooth, and slash packed for cover).
- If excavated, the stream channel will be wider than the natural channel and set to natural grade. The approaches to the crossing will be sloped back to prevent stream bank failure.

### **Archaeological or Historic Sites**

Equipment shall not to enter archaeological or historic sites unless the operator is closely supervised by an Archaeologist or Fire Suppression Repair Specialist. Many known sites have been flagged by the incident archaeologists. Archaeological or historic sites are delineated in the field with several types of flagging colors and designs, but generally flagging that appears to be encircling a given feature must be avoided. Known flagging schemes are as follows:

CAL FIRE:	Yellow and black stripped & Orange and black stripped
U.S.F.S.	Yellow and black stripped tied with blue
Santa Lucia Preserve:	White and blue tied together & Yellow and black stripped

### **Waterbreaks/Waterbar/Cross Drain spacing**

Line or Road Gradient (%)	0-10%	11-25%	26-50%	50%+
Spacing	200 ft.	100 ft.	75 ft.	50 ft. (25' on Federal land)

Waterbreaks shall be cut diagonally with a minimum depth of 6" into existing grade with a 12" berm for a minimum height of 18". Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed into non-erodible material.

### **Conflicts with Suppression Activities**

Postpone repair activities that hamper access or other suppression actions. The location of needed repair actions shall be noted and relayed to the Fire Suppression Repair Group. DO NOT compromise fire lines by spreading flammable material across them.

## **Forest Service Wilderness and State Parks Special Instructions – Resource Advisor**

### **DOZER LINES - DIVISIONS K, M, P, and CONTINGENCY LINES**

- Dozer lines will not exceed 50 feet in width except for safety reasons.
- Dozer lines in Wilderness will be repaired later; construct line to minimize impact.
- Do not push brush off steep hillsides – it will be spread over the line during repair.
- Minimize removal of top soil – it will be spread back over the line during repair.
- Avoid riparian areas, seeps and springs.
- Avoid archeological sites flagged with black/yellow and blue ribbon

### **Wilderness Minimum Impact Suppression Tactics (MIST)**

The intent of Minimum Impact Suppression Tactics is to suppress a wild fire with the least impact to the land. Fire conditions and good judgment dictate the actions taken. Consider what is minimally necessary to halt fire spread and contain it within the fireline.

#### **FIRELINE CONSTRUCTION PHASE:**

- Use cold-trail, wet line or combination when appropriate.
- Allow fire to burn to natural barriers.
- If constructed fireline is necessary, use minimum width and depth to check fire spread.
- Remove or limb only those fuels that if ignited would have potential to spread fire outside the fireline.
- Minimize cutting of trees, burned trees, and snags unless determined they will cause fire spread across the fireline or endanger workers.
- Cut brush or small trees flush to the ground; camouflage the cut surface with soil or brush.

#### **HELISPOT CONSTRUCTION:**

- Consider using a long line remote hook in lieu of constructing a helispot.
- If construction is necessary, consider natural openings, or previously used areas. Cut only what is necessary to achieve safe operating space.

## **HUMAN RESOURCE MESSAGE**

### **YOUR RIGHTS AND RESPONSIBILITIES**

#### **YOU HAVE THE RIGHT TO:**

- ❖ Work in a harassment-free environment where people treat one another with dignity, equity, courtesy, and respect.
- ❖ Say “no” to unwelcome advances or requests for favors.
- ❖ File a complaint or grievance through appropriate avenues.

#### **YOU HAVE THE RESPONSIBILITY TO:**

- ❖ Behave in a manner that treats people with dignity, equity, courtesy, and respect.
- ❖ Abide by agency and incident ethics and conduct regulations.
- ❖ Report any harassment or other inappropriate behavior you observe or experience.

HR Office is located in the Quonset Hut (tent) #15 at ICP

HR (Fire) SPECIALIST: MARY MCDONOUGH

HR (Fire) SPECIALIST Trainee: WYTOSHA CONEY

## *Human Resource Message of the Day* **August 1, 2016**

# **Food for Thought**

### **Self-Check-In / Evaluation**

### **FATIGUE**

Fatigue affects your physical and emotional state! It can have a negative impact on your concentration, your conduct, and speech. This can have all sorts of consequences so please make an effort to rest up and get back to your normal productive self!

**“In matters of style, swim with the current; in matters of principle, stand like a rock.” - Thomas Jefferson**

### **HUMAN RESOURCE SPECIALIST (HRSP)**

- Mary Donough
- Tosha Stephens-Coney

## **Archaeological and Historical Sites Fireline Guidance for the (NAME) Incident**

**Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:**

1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.
2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment.
3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.

## **Wilderness Special Instructions – Resource Advisor**

### **DOZER LINES - DIVISIONS K, M, & P**

- Dozer lines will not exceed 50 feet in width except for safety reasons.
- Dozer lines in Wilderness will be repaired later; construct line to minimize impact.
- Do not push brush off steep hillsides – it will be spread over the line during repair.
- Minimize removal of top soil – it will be spread back over the line during repair.
- Avoid riparian areas, seeps and springs.

### **Wilderness Minimum Impact Suppression Tactics (MIST)**

The intent of Minimum Impact Suppression Tactics is to suppress a wild fire with the least impact to the land. Fire conditions and good judgment dictate the actions taken. Consider what is minimally necessary to halt fire spread and contain it within the fireline.

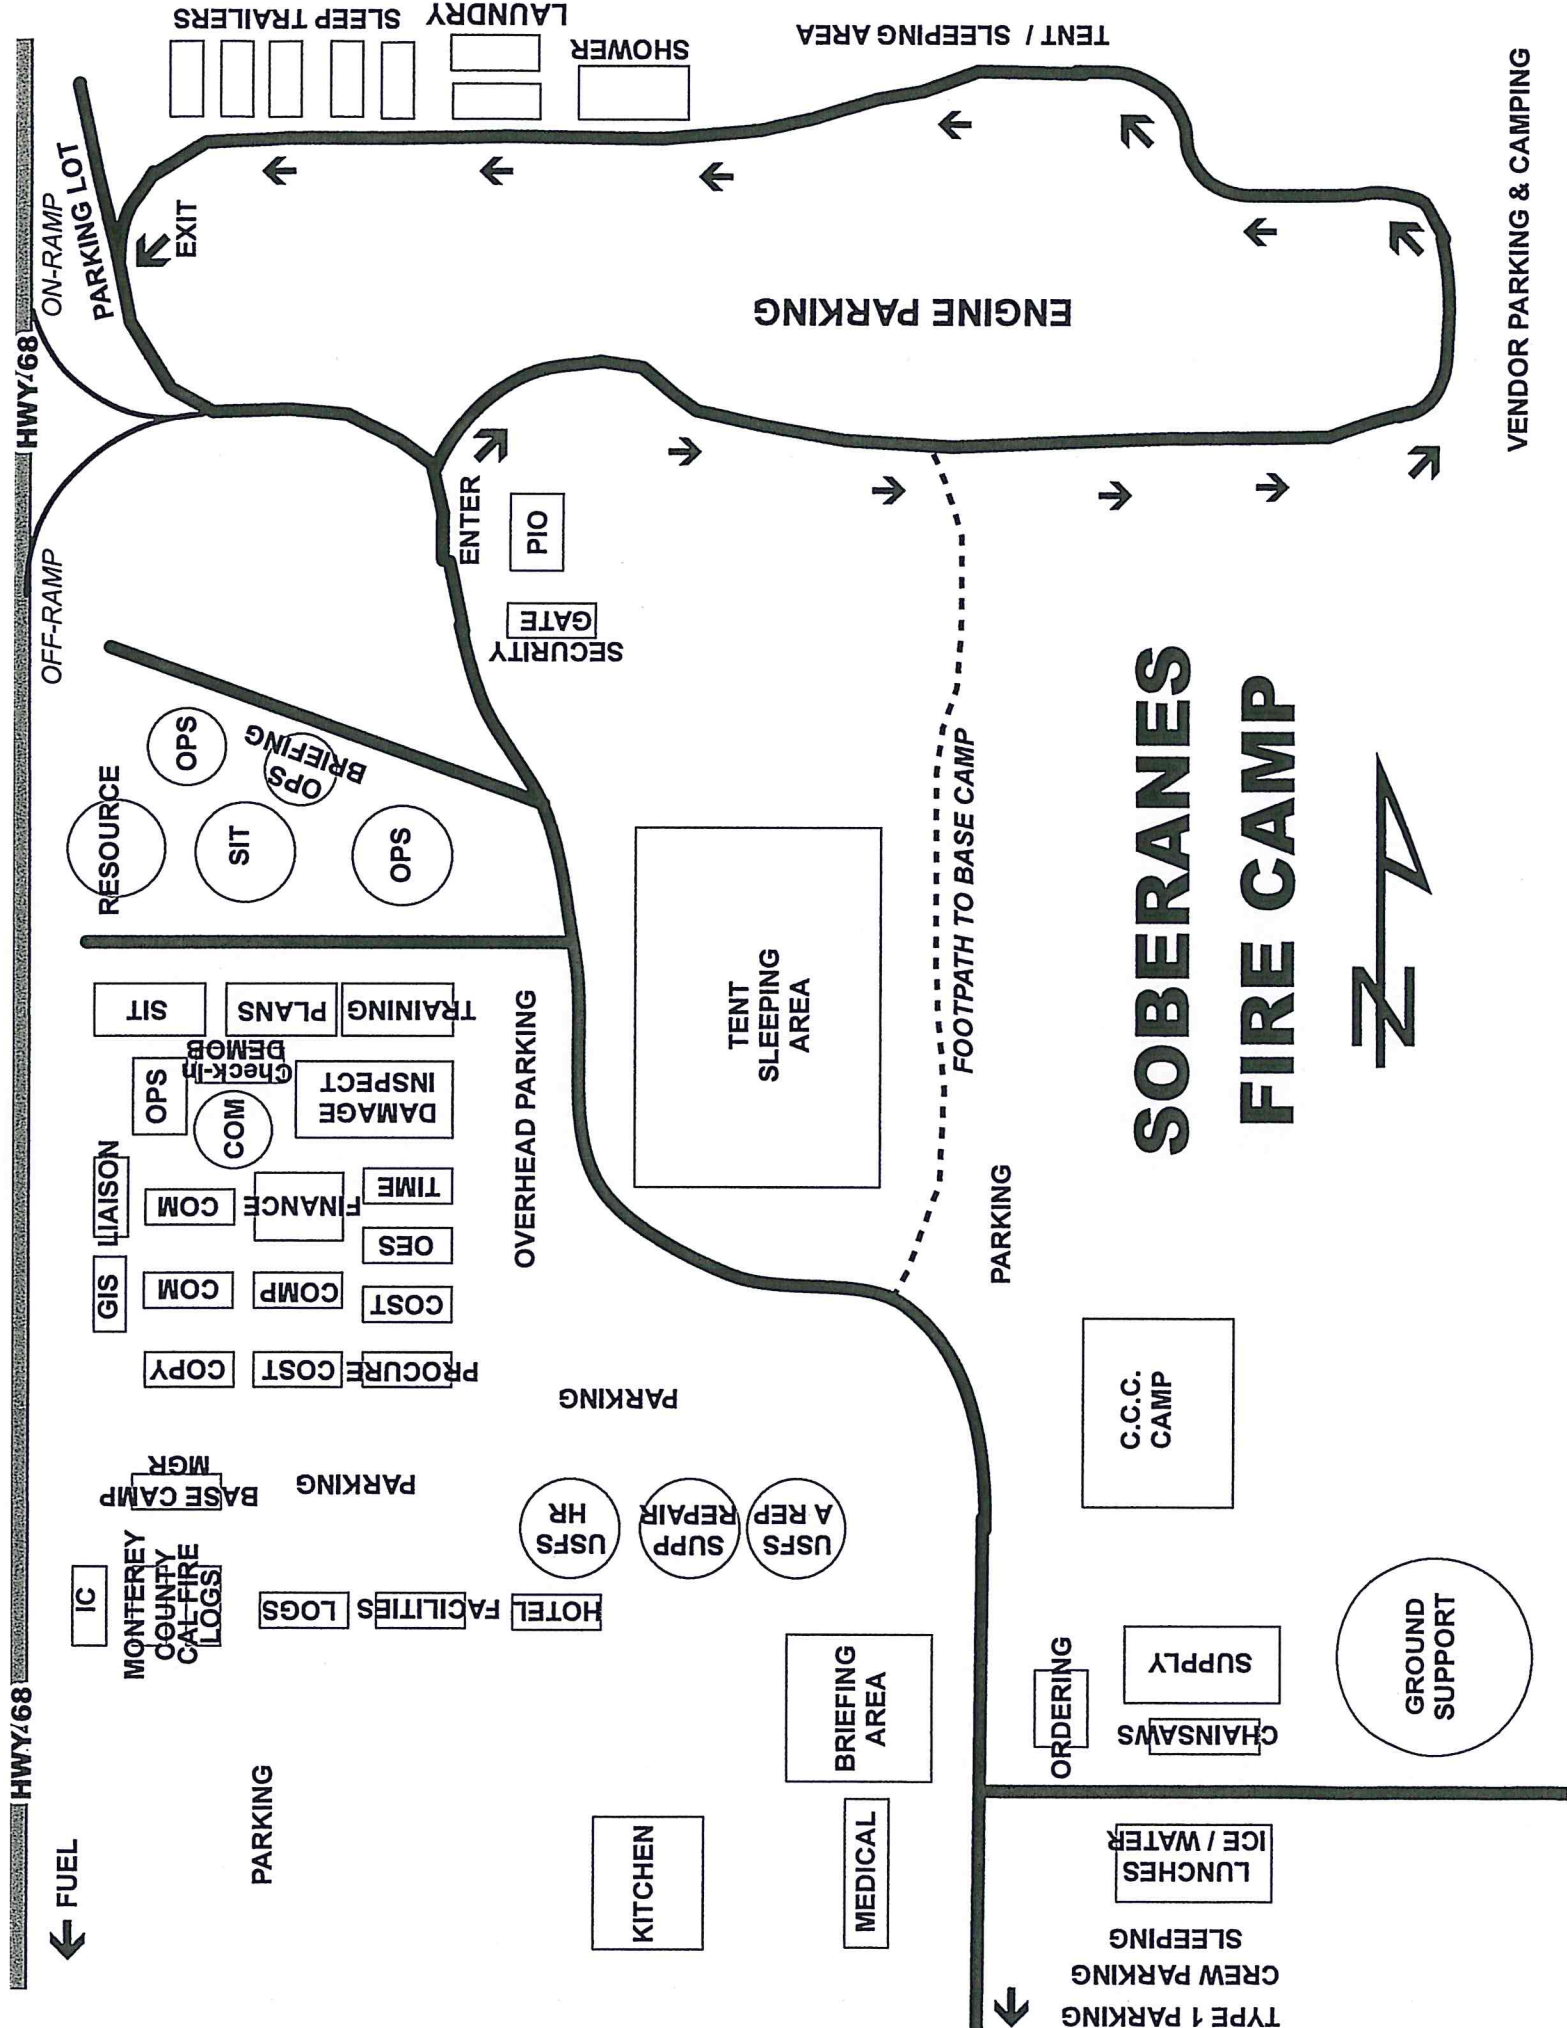

#### **FIRELINE CONSTRUCTION PHASE:**

- Use cold-trail, wet line or combination when appropriate.
- Allow fire to burn to natural barriers.
- If constructed fireline is necessary, use minimum width and depth to check fire spread.
- Remove or limb only those fuels that if ignited would have potential to spread fire outside the fireline.
- Minimize cutting of trees, burned trees, and snags unless determined they will cause fire spread across the fireline or endanger workers.
- Cut brush or small trees flush to the ground; camouflage the cut surface with soil or brush.

#### **HELISPOT CONSTRUCTION:**

- Consider using a long line remote hook in lieu of constructing a helispot.
- If construction is necessary, consider natural openings, or previously used areas. Cut only what is necessary to achieve safe operating space.

# FIRING OPERATION CHECKLIST

Location: \_\_\_\_\_

Date: \_\_\_\_\_ Time: \_\_\_\_\_
